📅 1999/06/22

Education

- **Bachelor of Computer Science (Good - GPA 3.24)**
  Hanoi University of Industry
  Aug 2017 - Jan 2021
  Specialized in Computer Science.
  Completed coursework includes: data structures and algorithms, web development, database management, artificial intelligence, Windows Form and C#.

Skills

HTML/CSS - Experienced

Bootstrap - Experienced

JavaScript - Expert

Ajax - Experienced

JQuery - Experienced

Python - Experienced

Django - Experienced

REST APIs - Experienced

PostgreSQL - Experienced

Summary

Frontend Developer with 4 years of experience building responsive, user-friendly web interfaces, and over 6 months of hands-on experience in backend development using Python, Django, and PostgreSQL. I have successfully contributed to multiple real-world projects and recently completed several full-stack applications. I am now seeking opportunities to grow as a Full Stack Developer, leveraging both frontend and backend skills to build complete, efficient, and scalable web solutions.

Work Experience

Front-end developer, Foxconn Industrial Internet, Bắc Ninh
June 2021 - Present

- Developed and optimized user interfaces using HTML5, CSS3, JavaScript, Bootstrap, and jQuery.
- Managed the frontend team: assigned tasks, reviewed code, and ensured code quality.
- Designed responsive layouts, ensuring optimal display across various devices (desktop, tablet, mobile).
- Optimized browser performance by applying clean coding practices, code splitting, and CSS/JS minication.
- Integrated with backend systems by consuming RESTful APIs to retrieve and display data.
- Collaborated closely with the UI/UX team to translate designs into fully functional products.
- Participated in over 10 real-world projects across multiple domains, including logistics, warehouse management, and human resources management.

Back-end developer, Freelancer (Part-Time), Remote
November 2024 - Present

- Developed and maintained the back-end system for a news website using Django.
- Designed and implemented the database with PostgreSQL, ensuring data stability, performance, and security.
- Built RESTful APIs using Django REST Framework to support seamless front-end integration.
- Modeled data and handled business logic following the MVC (Model-View-Controller) pattern.

Git - Experienced

Languages

English - Basic

- Created and optimized complex SQL queries, including the use of raw SQL when necessary.
- Implemented JWT-based authentication and authorization to manage user sessions and roles.
- Applied robust security practices, including CSRF protection, input validation, and Role-Based Access Control (RBAC).
- Collaborated with front-end developers to ensure smooth API consumption and user experience.
- Participated in system deployment and troubleshooting to ensure reliability in production.

Hobbies

- Coding and research tech.
- Reading book.
